

# 3 FUN SUMMER ACTIVITIES THAT HELP YOUR CHILD GROW

## LEARN TO PLAY AN INSTRUMENT!

Based on a study from UCLA, students who learn to play a musical instrument exhibit **improved test scores and higher reading proficiency.**

The average SAT score of a student who takes music lessons is **41 points higher for the math portion and 57 points higher for the verbal portion.**

Children who learn to play piano have **better reasoning ability, particularly spatial-temporal reasoning,** as well as a **better understanding of proportions and fractions.**

Just nine months of piano or voice lessons is enough to **raise a child's IQ scores by almost three percent.**

Students who learn music over the course of their education are **more frequently recognized with academic awards and honors.**
